

INTERNATIONAL SYMPOSIUM

Leiden Headache Center into a new era

4 & 5 JUNE 2022

ACCREDITATION

NVN requested
EACCME requested

Join us in the weekend of the 4th & 5th of June 2022
for the international symposium on the topic of
'The Leiden Headache Center into a new era'.

This symposium provides an overview of the latest findings and treatment options in the field of headaches and migraines which can be applied in clinical practice.

International top experts and researchers

The Leiden Headache Center with international top experts, will take the audience on a journey through trendsetting research, treatment options for migraine and other headaches. They will discuss questions such as: what are monoclonal CGRP antibodies? What is chronic migraine and what about medication overuse? Are headaches different in women than in men and which types of secondary headaches can be treated well?

TARGET GROUPS

This symposium is intended for (inter)national neurologists or residents-in-neurology, researchers including Phd-students in the field of headache, and other healthcare providers with interest in headache.

PRICES

€ 350 / € 250 (reduced fee)

LOCATION

Stadsgehoorzaal, Aalmarktzaal
Breestraat 60, 2311 CS Leiden, The Netherlands

Sponsoring is according to the CGR-conditions and supplementary conditions of LUMC.

PROGRAMMA

SATURDAY 4TH OF JUNE 2022

08:15 **Registration**

08:45 **Welcome!**

MECHANISMS OF MIGRAINE

09:00 **Location of migraine symptoms in the brain**

Dr. Philip Holland

09:25 **Headache mechanisms in animal models**

Prof. dr. Cristina Tassorelli

09:50 **Genetic models from mice to man**

Dr. Else Tolner

10:15 **Connecting migraine and epilepsy**

Dr. Cenk Ayata

10:40 **Coffee break**

BIOMARKERS

11:20 **Imaging**

Prof. dr. Arne May

11:45 **Genomics**

Irene de Boer

12:10 **Vascular biomarkers**

Prof. dr. Antoinette Maassen van den Brink

12:35 **Proteomics/Metabolomics**

Prof. dr. Arn van den Maagdenberg

13:00 **Lunch break**

CGRP – CLINIC

14:00 **Pathophysiology, route to CGRP**

Prof. dr. Peter Goadsby

14:25 **Clinical trials - past and future**

Prof. dr. Christian Lampl

14:50 **Predictors for response**

Simone de Vries Lentsch

15:15 **CGRP in CH and other headaches**

Prof. dr. med. sci R.H. Jensen

15:40 **Tea break**

TOWARDS NEW TARGETS

16:10 **Provocation studies for new targets**

Prof. dr. Messoud Ashina

16:35 **Pathophysiology underlying new targets**

Prof. dr. Rami Burstein

17:00 **Organ-on-chip models for drug testing**

Dr. Jean-Philippe Frimat

SUNDAY 5TH OF JUNE 2022

08:30 **Registration**

GENDER AND DIVERSITY ASPECTS OF HEADACHE

09:00 **Epidemiology and impact of migraine**

Prof. dr. Simona Sacco

09:25 **Introduction into female specific aspects on migraine**

Prof. dr. Ann MacGregor

09:50 **Sex-hormones and migraine**

Dr. Daphne van Casteren

10:15 **Epigenetics and gender**

Dr. Patricia Pozo-Rosich

10:40 **Coffee break**

OTHER HEADACHES

11:10 **TACs**

Dr. Rolf Fronczek

12:00 **Chronic migraine and Medication Overuse Headache (MOH)**

Prof. dr. Gisela Terwindt

11:35 **Posttraumatic headache**

Håkan Ashina

12:25 **Idiopathic intracranial hypertension abs headache**

Prof. dr. Alexandra Sinclair

12:50 **Closure and Adjourn**

*The presentations are in English
Time for discussion is included*
